

The **BOMAR individual 510.330 GANC** is a fully automatic double column band saw with a large cutting capacity, miter cutting capability, simple handling and excellent cutting performance.

The saw frame moves in tolerance-free preloaded linear guides. The feeding length is up to 23.6" in one stroke and the high resolution measuring system guarantees highest accuracy. Due to the integrated roller table with cover plates in between the rollers the material transport of even very short pieces is possible reliably.

The automatic mode allows miter cuts with angles up to 45° and in the semi-automatic mode even cuts with angles up to 60° are possible.

With the infinitely adjustable saw drive, an easy to operate PLC-control and many other standard features this machine is one of the best equipped machines in its class.
